The **Federation Report** is the official publication of the Federation of American Aquarium Societies and is published bi-monthly. Views expressed in articles are those of the author and not necessarily those of the Federation of American Aquarium Societies, its Directors, Officers or members.

Materials for publication should be submitted to the Editor for consideration according to the established deadlines. The Federation of American Aquarium Societies reserves the right to reject any materials as unsuited to its purposes and goals and assumes no liability for such refusal. The **Federation Report** also has the right to edit any article as needed. All materials submitted are considered as original works of the author unless otherwise designated.

By submitting materials for publication the author is irrevocably granting the Federation of American Aquarium Societies all rights to print, reproduce, distribute or otherwise publish, in any format whatsoever, the work submitted. The author affirmatively acknowledges that he/she is the owner of the materials and maintains all rights to the distribution and reproduction of same and that the materials provided do not infringe upon any copyrighted materials. Author indemnifies and holds harmless the Federation of American Aquarium Societies.

Items submitted for **Calendar of Events** must be submitted by the deadline of the previous issue.

President's Message

Jerry Montgomery
President

I will start this month by recognizing the generosity of Kingfish Services, That Fish Place and That Pet Place for a donation that was given to FAAS, CAOAC, and ACA. They gave a donation of \$100 to FAAS to assist the organization in promoting the aquarium hobby.

I would like to personally take this opportunity to recognize and say THANK YOU to both Ray "Kingfish" Lucas/Kingfish Services and Scott Lebowitz/That Fish Place and That Pet Place for their continued support of the hobby. Their efforts and support are greatly appreciated by FAAS.

It will soon be the end of the year and now would be a good time for everyone to take a look at the deadlines for Publication Awards, BAP, and HAP. Make the appropriate chairman in your club aware of what is necessary for participation so they can begin to organize submissions ahead of time to make participation easier. I would like to see every member club participate in these programs this year, if possible. If you have questions about a specific program contact the appropriate chairman for clarification.

If you have not yet checked out the FAAS Website take a minute and give it a look. You should be able to access the information in PDF files that you need to submit materials for program participation there. We would also like to add your groups address to the list of member clubs if you have a Website. Notify the Webmaster of its location so he can establish a link. Please send it to me also, so I can see what is important to your group.

I recently have changed internet providers and now have a new address for email. Please change my email address immediately to jmont@insightbb.com. I will try to notify each of you directly, as well, if I have your current address in my address book.

Please help your club get the most out of its membership by your full participation in the various recognition programs offered and enjoy this wonderful hobby we all love.

Calendar Of Events

September 2003

September 12 - 14, 2003 - Friday, Saturday & Sunday Federation of Texas Aquarium Societies Yearly Convention

Clear Lake Texas. The Houston Aquarium Society will be the host for the event. For more information contact Hal Collins at halcollins29@juno.com

September 13, 2003 - Saturday Tri-County Tropical Fish Society's Fall Auction

Limestone High School in Bartonville, IL. Please contact Roger Halleen at Roghfish@aol.com or (309) 699-7394 for more information.

Expired Or Expiring Memberships

The following memberships have already expired or will be expiring shortly.

Tom & Pat Bridges 10/03

Eric Hanneman 10/03

Aquarium Club of Lancaster County 11/03

Calgary Aquarium Society 11/03

Colorado Aquarium Society 9/03

Federation of Texas Aquarium Societies 8/03

Greater City Aquarium Society 11/03

International Betta Congress 10/03

Medina Aquarium Society 7/03

Milwaukee Aquarium Society 11/03

Minnesota Aquarium Society 6/03

Nassau County Aquarium Society 9/03

Ohio Cichlid Association 10/03

Saskatoon Aquarium Society 8/03

Silicon Valley Aquarium Society 7/03

Tampa Bay Aquarium Society 10/03

Do the right thing on the web

In the web world, content is king. If your club web site is poorly organized and contains little useful information, your site visitors will assume your club is poorly organized and offers little.

An interesting corollary is that if your web site is great, it will greatly enhance the reputation of even the smallest aquarium club.

At the minimum, your club web site should be kept up to date with fresh information. I've visited many web sites where the front page of the site asks you attend last month's meeting. That's just not professional!

Your web site will never be finished... wrap your head around that! It will change, sometimes daily, as you add new information, delete stale content, and reorganize. Your club board and committee members need to "push" information to your webmaster on a regular basis. If possible, your webmaster should be on your board and attend board meetings.

A good web site is "sticky". There's information on the site that makes visitors want to explore further; the site has value to them month after month.

The organization of your club's site needs reflect the goals of your club. If you have decided that your web site's primary goal is to drive visitors to your revenue-generating auctions, then you need to feature auctions and auction notification on your web site.

In my next column...

I'll cover best practices for an aquarium club web site including writing for the web, navigation, organization and choosing a web tool.

Newsletter and Membership Committee con't from page 13

something that you are not aware of.

Again, I am requesting that you please send me the listing of clubs in your areas so that I can contact them about membership in FAAS. The more clubs/societies that are members, the more FAAS's impact will be in the industry.

Please remember, if you are on the Board or are a Committee Chairman, please go to the website and download a copy of the newsletter, as we are no longer mailing them to these individuals.

On The Web

Rick Borstein
FAAS Web Master

In the last "On the Web", I discussed how to set priorities for your club on the web. The next step, is finding your Webmaster, deciding where to host, and understanding how your web site will be perceived by site visitors.

Find a Webmaster

A top-notch Webmaster has a combination of skills. This person ideally is technically savvy, knows HTML and perhaps even has programming skill. A good Webmaster keeps up with the trends in the industry, has up-to-date equipment, high-speed internet access and an artistic flair. A proven record of accomplishment building web sites would be great.

Bad news—you probably won't find this person! However, in most of the clubs I've visited there is a computer-savvy person or two and often someone who works in the high tech industry. Can you identify someone like this in your club? They might make a good Webmaster.

A choice that can work out well is to bring on somebody who may not know a lot, but is eager to learn about the web. Your club web site may be the perfect project for someone who is trying to get started.

You need to "sell" one of your members on taking on the job. Flattery and appealing to the good of the club are a good way to start. Your club web site is important! You will want to select someone who is reliable and will take on the job for at least two years.

I do not recommend that you ask for volunteers at a meeting. Very few folks will raise their hand without knowing about the commitment. Instead, mention that the board has decided to make the web a priority and that members interested in helping out should talk with you one on one.

Your Own Domain

I cannot underestimate the importance of having your own domain. Only about half of the FAAS member clubs do. It's a problem.

Your domain is who you are on the web.

It's tempting to go with a free hosting service (see table below). However, choosing this option will yield a domain name that nobody can remember such as <http://www.angelfire.com/pets/fish/>

con't on page 4

**On the Web
con't from page 3**

yourclub.html. That URL is not conducive to sharing with a potential new member you meet at a pet store or in an elevator conversation at work. Heck, it will fill up an entire business card. It's too long, too hard to remember and definitely not effective.

Your domain name is the key to your club's web marketing efforts. A short, clear, easy to remember domain name will attract new members and draw people to your events.

An excellent example of a domain name is apple.com. The .com suffix is the most common and even web neophytes know how to enter it in their browser. You can also use suffixes such as .net, .org, .tv and .info. FAAS was late to the web so we had to settle for the .info suffix. Still, it's better to be faas.info than federationofamericanaquariumsocieties.com. Who's going to remember that? To find out if a domain name is taken, go to networksolutions.com. Virtually every hosting company also offers access to the whois database, which maintains all the various domain names. You can type in your name ideas and find out if the domain is available.

Where to host? What can you afford?

You have a variety of choices for hosting your club web site. Prices range from free to fifty dollars or more a month. Here are some of your choices:

Type of Hosting	Example and Cost	Description
Co-hosting	Freeservers.com, Geocities, Tripod, Angelfire and many others. Free limited web site serving.	Unfortunately, you get what you pay for with most of these free services. These services blanket your site visitors with pop-up ads and your web pages with intrusive banners, which turn off potential site visitors. Loading times can be poor and these sites receive a lower rank on the major search engines. Bandwidth (the total number of pages served for free) can be very limiting. With a free service, you don't get your own domain name. The URL for your site will be something like http://www.angelfire.com/pets/fish/yourclub.html . This long address is hard to remember for your intended audience. The free services usually offer decent on-line page building tools, but may limit you from doing any creative design. Still, if this is all you can afford, it is better than nothing.

Newsletter And Membership Committee

Judi J. Peterson
Editor
Membership Chairman

First of all, I am surprised and disappointed in most of you. The newsletter is for the benefit of all of the societies that are members of FAAS and most of you are failing to take advantage of one of the most important sections of the newsletter, the Calendar of Events. I am sure that many of our members are just like my husband and myself. If we are in any given area and we know of any fish events that are taking place, we will make every effort to attend them, however, it is hard to attend

Editors Note: Some of the listing may be slightly out of order. I appologize for this, but the listing was not received in alphabetical order and therefore had to be alphabetized as time permitted.

**On the Web
con't from page 4**

Type of Hosting	Example and Cost	Description
Co-hosting	Nothing.	Park your site at another site. One of your members may have their own domain. You can serve your pages from their site, probably for free. The URL will still be long, something like www.membersite.com/yourclub.htm , but you won't be subject to pop-ups and ads. One disadvantage is that you are dependent on the reliability of your hosting member to pay and probably maintain the site. FAAS co-hosts at www.gcca.net for free. I run both sites so it works OK for us.
Domain Forwarding	Network Solutions. About \$35-\$50 per year.	If you want your own domain, e.g. www.yourclub.com , but can't afford to pay monthly hosting, this may be an option for you. When a potential site visitor types in your URL, it will take them to the free or co-hosted location where your pages are located.
Basic Web Hosting	Earthlink, and many others. \$7 to \$25 per month.	This option is probably the best choice for most clubs. By paying a bit more, you get access to many services your club can use. Lots of bandwidth, your own domain name, one to perhaps unlimited email accounts, form to email scripts, and more. In this group you will find a wide array of pricing that is bewildering. Some \$7 per month offers appear to be as good as the \$25 per month offers. However, if it seems to good to be true, it probably is. Most cheap hosting companies have slow servers, place ads on your site and have poor customer service.
Advanced Web Hosting	Various	\$40-90 per month The largest clubs may want to explore hosting services that offer advanced features such as rich media support for streaming Real, QuickTime or Windows Media content, shopping carts, and complete scripting support and list serve support. In particular, if you will develop a dynamically driven web site, you may need to look for a more expensive service. I'll be explaining some of these advanced features in future articles.

Delegates' Council Report

Al Priest
Chair, FAAS Delegates' Council

The Counsel has made its recommendations to the Board with respect to additional changes to the Publication Awards. We are presently awaiting the Board's decision. During the course of our discussions regarding the publication awards, one Delegate suggested an award for society websites. The members of the Council seem agreed to this award in principle, but are not in agreement yet on specifics. If a single award is given (let's call it "Society Website of the Year" for lack of a better term, as the actual award has not been agreed upon yet), then the Council seems agreed that no criteria should be specified in the rules. (In other words, let the judge decide for him or herself which website is best, using whatever personal biases and preferences that judge has.) However, if more than one award is given, then it seems that criteria are implicit in whatever awards are set up. For example, an award for Best Graphics necessarily implies graphics, an award for Most Informative implies resource information, etc. Because of summer vacation, and the fact that the Board has not (as of the date of this writing) voted on the last set of Council recommendations, I have not pressed the delegates on this. I invite all delegates who have not yet given their opinions, and all FAAS member societies with websites that would like to see a FAAS Website Award Program, to contact me via email with their comments.

Breeder's Award Program

Scott Tetzlaff
Chair, Breeder's Award Program

It's that time of year again or at least every other year. These are the species and number of spawns that have been recorded. The first spawn date, club 1st spawned, date 1st spawned, total spawns and person 1st spawned have been included. We will continue to print the listing monthly, as space permits, until the entire listing has been published.
